those of physical elements, and both, when affected, acting upon the body in the same manner. The bread of this world infuses life through the outer surface, and the bread of heaven infuses life through the inner surface. The result in both cases is satisfaction and strength. One of the results of the condensation of life will be, the bringing of these principles into the field against the powers of disease and death. When life shall accumulate in unity, by the centripetal force of love, till all hearts shall radiate and receive a perpetual sunshine of joy, it is not unphilosopical to believe that the substantial physical results (at least so far as health is concerned) of an actual *amelioration of climate*, will be obtained. Though the outer surface of life may be exposed to the cold of the North, yet if the inner surface dwells in the warm regions of love, as it will when all shall be one, the body will have many benefits of a genial climate; and in proportion as the action of the inner surface prevails over that of the outer, health will become independent of the external elements, and death at last will lose his prey.

We have before us a sketch of the great MIRACLE OF UNITY for which Christ offered his prayer and his life, and by means of which he proposed and still proposes to convince the world that God sent him on his mission of love. Who will not heartily join his prayer, and offer himself a sacrifice for its fulfillment?

NEWS ITEMS.

THE hungry poor of Boston are fed at the rate of over a thousand a day at free soup-houses.

BARNUM'S Museum has been destroyed by fire. The Giantess and Fat Boy, we are pleased to learn, made their escape.

THE New York Constitutional Convention has concluded its sessions, and the new Constitution which it has framed will be submitted to the people at the next State Election.

THE impeachment preliminaries are mostly arranged. The House of Representatives has framed articles against the President, twelve or more in number, and reported them to the Senate. Nine of them are based on the Stanton-Thomas collision. The managers appointed by the House to conduct the prosecution are Messrs. Stevens, Butler, Boutwell, Bingham, Wilson and Williams. The Democratic members of course protested against the proceedings, and forty-five of them signed a document to this effect; but it was not permitted to be read. The Senate, on its part, has promulgated rules for the conduct of the trial, and it only remains to name the day for the session of the High Court, and to issue its summons. Meantime the country looks quietly on, in some doubt whether it has a President now or not, and with a gradually growing impression that the Presidential function itself is more ornamental than necessary or useful.

INDEX TO VOL. IV.

[MOUNT TOM SERIES.]

The letters h. t. after the title of an article, denote a Home-Talk, and the letters n. d. a Noon Discourse.
